**Tools**: VS, Eclipse, SQL Dev, Postman, Burp Suite, Git, Jira, Bitbucket

**Concepts**: Data Structure & Algorithm, Object Oriented & Functional Prog, Collections, Multithreading, Design Pattern, Security, Networking, JPA, REST.

**DevOps: Deploy-OS:** Linux, Windows **Cloud-Tech**: Firebase, Heroku

## INTERNSHIPS & PROJECTS

*Jan/2019 – Apr/2019 [0Yr 4M]*
● PSoC - Hemoglobin Measurement System (Major Project)

A device that non-invasively detects haemoglobin content of the blood. The device is built on PSoC (Programmable System-on-Chip) coded in C language using concepts of Multithreading and Collections. read more

*Jun/2018 [20 days]*
● DRDO - QRSAM Code Optimization (Internship Project)

Deployed in QRSAM (Quick Reaction Surface to Air Missile) department under Scientist Divyesh Anand Nayak. I was responsible for optimizing Java code using the concepts of DS & Algo, OOP, Design Patterns.

## ABOUT ME

A proficient computer programmer engaging with enterprise software that run the world. My works lie behind the scenes of Investment Banking applications across Canada and Europe. Being strongly left (analytical) and right (creative) brained, I evolved as a Full Stack Developer with expertise in Java and JavaScript. As a youngster, I am excited about relocating, working with different technologies, businesses and cultures.
